

(a) Stage 1

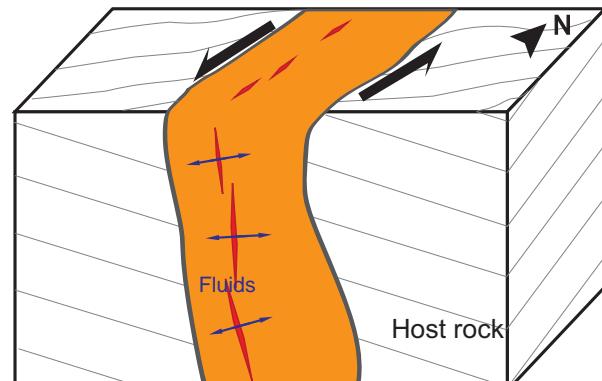

Initial ductile deformation of the mylonite at low differential stresses

Mylonite

(b) Stage 2

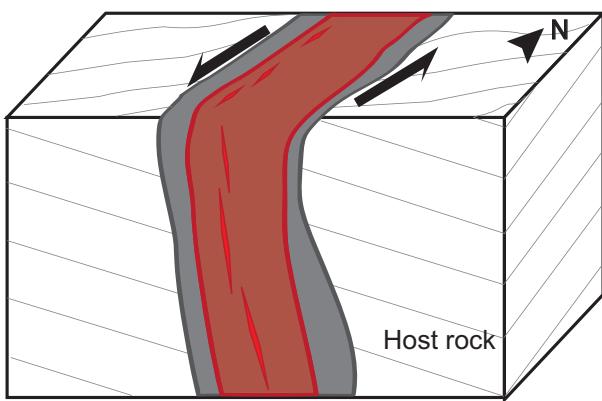

Transient brittle deformation under ductile conditions and emplacement of quartz vein

Mylonite Extensional veins

(c) Stage 3

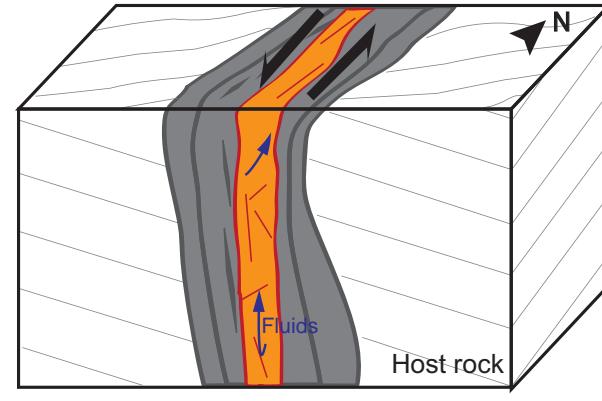

Mylonitic creep in a narrowing shear zone

Inactive mylonite Mylonite

(d) Stage 4

Strain localization and formation of cataclasite and pseudotachylites

Inactive mylonite Cataclasite

(e)
