

***Interactive comment on “Radon signals at the Roded site, Southern Israel” by G. Steinitz and O. Piatibratova***

**Anonymous Referee #1**

Received and published: 1 September 2010

The authors present a wide number of data collected in a long observation period. As indicated in the enclosed references list, They have just published lot of them. The paper doesn't give any new useful information. The existence of daily and seasonal radon variation is a well known phenomenon as the same Authors argument in the introduction.
