

Interactive comment on “Optimal locations of sea-level indicators in glacial isostatic adjustment investigations” by H. Steffen et al.

B. Vermeersen (Editor)

I.I.a.vermeersen@tudelft.nl

Received and published: 19 February 2014

The two anonymous reviews are supportive, but it is clear that the paper does need a thorough revision before it could become acceptable for publication in the Special Issue. Pay some special attention to revising some of the figures (Reviewer 1) and text (Reviewer 2).

Please, address the Interactive Comments by both reviewers by adding Reply's to the se-2013-70 website before submitting a revision.
