

Interactive
Comment

Interactive comment on “Lithosphere and upper-mantle structure of the southern Baltic Sea estimated from modelling relative sea-level data with glacial isostatic adjustment” by H. Steffen et al.

B. Vermeersen (Editor)

I.I.a.vermeersen@tudelft.nl

Received and published: 4 April 2014

In my opinion you have addressed all comments, suggestions and questions raised by both reviewers adequately and satisfactorily.

I therefore would like to encourage you to submit a revised version of your manuscript.

Sincerely,

Bert Vermeersen
