Received and published: 7 May 2014

We are grateful for this review. We could include a list of terms which are scattered through the paper after an initial definition. These would seem to include the following:

MLR

MVM

PN

AIC

C1193

BIC

κ

α_i

g

\mathbb{R}^2

Y

y

μ

Σ

$\mathcal{N}_2(\cdot, \cdot)$

However, the final decision as to whether this is appropriate use of space in the Journal lies with the editor, and we ask for explicit guidance on that.
