Corrigendum to “response to Reviewer#1”

The authors wish to apologise that a sentence in the “Response b2)” as published in the above issue contained an error. We rectify this sentence (page C34):

We believe that a fault should be considered blind if slip at and near the surface (it does not matter if it is dynamic or essentially passive slip) amounts to a significant fraction of slip at depth.

as follows:

We believe that a fault should be considered surface-breaking (i.e. non-blind) if slip

C45

at and near the surface (it does not matter if it is dynamic or essentially passive slip) amounts to a significant fraction of slip at depth.
