Interactive comment on “Assessing accuracy of gas-driven permeability measurements: a comparative study of diverse Hassler-cell and probe permeameter devices” by C. M. Filomena et al.

C. Filomena

claudio.filomena@fau.de

Received and published: 28 August 2013

In comment No.2 posted yesterday, I have realized that there was an error in the last sentence of the "rock-volume-problem".

The correct sentence is: As a result, TinyPerm-measurements are 34-41% lower on large rock blocks (unconfined samples) than on 1-inch plug samples, but they still remain within the same permeability order.

I apologize for this error.
