Dear Prof. Dr. Shuhai Xiao,

This article is a product of the project completed by the Geological Survey of Turkey. The article contains new geochronological and geochemical data and presents firstly detail geodinamic model for the Ankara Mélange.

We did addition to ‘Abstract’ and ‘Introduction’. We also did a columnar section showing all units (ophiolite, ophiolitic mélange and island-arc magmatic rocks) of the investigation area.

C777

We believe that this article will contribute to further studies.

Kind Regards

Ender Sarifakioglu
