

Interactive comment on “The sensitivity of GNSS measurements in Fennoscandia to distinct three-dimensional upper-mantle structures” by H. Steffen and P. Wu

Anonymous Referee #1

Received and published: 22 January 2014

Detailed notes are available on an uploaded, simple text file. As to my rejection I quote from my review here: "So I tend to reject this ms, yet I would welcome a rebuttal before stating this as a final verdict. However it will turn out, both authors need to cooperate closely to address the problems and the textual presentation. The language problems are at a level where I would welcome a statement of confirmation by Patrick Wu that he has seen the submission at all."

The merit of a publication to a co-author comprises the entire paper, and what holds for the merit also holds for the responsibility.

Please also note the supplement to this comment:
