

***Interactive comment on “Effective buoyancy ratio: a new parameter to characterize thermo-chemical mixing in the Earth’s mantle” by A. Galsa et al.***

**P. Tackley (Referee)**

ptackley@erdw.ethz.ch

Received and published: 4 October 2014

To clarify: I did see an earlier version of this manuscript and give the authors some brief informal comments on it, which were similar to the ones here. It's very common for authors to acknowledge reviewers but in my experience this doesn't make reviewers more 'friendly'!
