Received and published: 8 October 2014

Dear authors:

The period for interactive discussion has finished. Some referees have recommended none or only minor changes (comments C753, C766, C767, C847 and C948). In contrast, many interesting comments and suggestions have been submitted in C854 and C858. All comments by these referees must be considered. Also, in my opinion, I very much regret to say that quality of English grammar and style is very poor. Please, revise it carefully, probably with help by a native-English speaker colleague. This is extremely important, a revised text with poor English will NOT be considered for publication in Solid Earth. When preparing the revised document, please, mark changes (with color, for example) and write a list with detailed answers to each comment by

C1104

referees in C753, C847, C854 and C858.

Best regards

Antonio Jordán
