Received and published: 12 March 2014

The paper of P. Nazarok, O. Kruglov, O. Menshov, M. Kutsenko, and A. Sukhorada (Magnetic implementation for soil erosion map. Case study from Ukraine) submitted for LDD needs deep improvements before publication. The quality of the English is very poor, and I recommend that an English native speaker will review the paper before resubmission. The paper does not have a proper discussion section, and no citation to papers on the same topics are found. Figure 2 is having , instead of . for decimals. The literature cited need to be improved and need to be more international as this is a well-known international scientific journal. I recommend to improve the whole paper to make the research under stable Sincerely Artemi Cerdà
