

## ***Interactive comment on “Characterization of hydrochars produced by hydrothermal carbonization of rice husk” by D. Kalderis et al.***

**J. Paz-Ferreiro (Editor)**

jorge.paz@upm.es

Received and published: 1 April 2014

In addition to the requests made by the referees I have a couple of additional minor comments as follows:

Please, add some conclusion to the abstract

Page 658, line 17: "renders"

Page 658, line 22: "has been proved"

Page 659, line 5: Please add a reference here

Page 659, line 12: Do not repeat the word "consisting"

Page 659, line 16: Please, add a reference here.

C171

Page 659, line 20: "Typical from"?

Page 660, line 19: Please, add coordinates.

Page 664, lines 17 and 18. Do not use twice the word "increase". Same in lines 21-22 where the word is repeated 3 times.

Page 665, line 4: Previous works are mentioned, but no citations are given.

Page 665, line 4: "it increased".

Reference list: Gajic should be moved before Gao

Table 1: The sum of humidity, volatile matter, fixed carbon and ash content is slightly over 100 %.
