Interactive comment on "Sedimentological characteristics of ice-wedge polygon terrain in Adventdalen (Svalbard). Environmental and climatic implications for the Late Holocene" by M. Oliva et al.

J. Ruiz Fernández (Referee)

ruizjesus@uniovi.es

Received and published: 28 May 2014

The submitted manuscript is of high quality, concise, clearly structured and well written. The methodology is appropriate, and the results, interpretations and conclusions of the paper are well founded. The number and quality of figures and tables is also appropriate. It can be recommended for publicaction as it is.
