

Interactive comment on “Variations of soil profile characteristics due to varying time spans since ice retreat in the inner Nordfjord, western Norway” by A. Navas et al.

B.R. Mavlyudov (Referee)

bulatrm@bk.ru

Received and published: 2 March 2014

All changes in the paper were done in compliance with recommendations.

There is only one remark. In “Specific comments” it is possible to read: “An explanation is included in the text and data on stone contents are provided in Table 2 and Figure 4.” It is really that data on stone contents are provided in Figure 4 but not in Table 2.

I think that paper is ready for publication.
