

## ***Interactive comment on “Relative tectonic activity classification in Kermanshah area, west Iran” by M. Arian and Z. Aram***

**Anonymous Referee #1**

Received and published: 7 August 2014

The paper by Arian and Aram , Relative tectonic activity classification in Kermanshah area, west Iran, is an interesting statistical study describing neotectonic position. I recommend the paper for final publication after a minor revision. In line 314: Dehbozorgi et al 2010 , is Motamedi instead to Saidi . In line 346" "T Ramirez-Herrera, M.T., 1993" is 1998 instead to 1993
