Table 1 is not necessary.

It is not necessary to present the extracted values in details for calculation of any index within tables 2-6. Provide a table with the values of calculated indices.

The legend of figures 4 and 8 needs some consideration!

The presented river profiles within figure 5 show some increase in elevation through its down-going course! I think those are errors and must be considered.

I cant see a distinguishing structures within figure 11, 13 and 14! If there are structural evidence please mark them with lines, boxes and etc.
