Thanks to both reviewers for their helpful comments on this manuscript. Also, thanks to the authors for their quick responses to the reviewer comments. At this point, the authors may proceed with their revisions based on the reviewer comments. I am satisfied with the initial responses by the authors.

Regarding a separate table for mathematical symbols, I agree with the authors that once the section has been reorganized, there is no need to add another table to the manuscript.

I look forward to reading the revised manuscript! Thanks again to the reviewers and to
C995

the authors.
