Received and published: 18 October 2015

Dear B.L. Fu

Thank you for your interest and submission to Solid Earth. I very much regret to inform you that, after careful review, two referees have provided negative comments and have suggested rejection.

Please find the reviewers' comments in the discussion page (<http://www.solid-earth-discuss.net/7/2151/2015/sed-7-2151-2015-discussion.html>). These comments may be useful for preparing a new manuscript and submission to another journal.

Discussion Paper

One of my reasons for rejecting (but not the only one) is that the manuscript objectives are far from the scope of the journal. After careful reading, I suggest you some journals with a scope your manuscript may fit:

- Agriculture Ecosystems and Environment
- Ecological Indicators
- Ecological Modelling
- Land Degradation and Development
- Land Use Policy

Kind regards,

Antonio Jordán Topical Editor of Solid Earth
