

## ***Interactive comment on “Alleviating aluminium toxicity on an acid sulphate soils in Peninsular Malaysia with application of calcium silicate” by A. A. Elisa et al.***

**Anonymous Referee #1**

Received and published: 12 November 2015

This paper address relevant scientific question within the scope of Solid Earth. Although this paper may not very novel concepts but it would be useful to know the research work that have been done in the different soil type. However, the conclusion and discussion need to be added on how this outcome of this work could be applied in the field situation and analyse and compare cost effective of this method.
