

Interactive comment on “Soil contaminations in landfill: a case study of the landfill in Czech Republic” by D. Adamcová et al.

Anonymous Referee #1

Received and published: 7 December 2015

Dear Authors,

Your manuscript presents a very interesting approach and it is well written. However, I would suggest some minor changes to the following figures:

Figure 2. I would delete it as it does not give much more information as explained in the text Figure 3. Please do not use so many colours, it does not give information. Figure 4. Please enlarge the images. Figure 5-6. As in Figure 3, do not use such amount of colours. Figure 5-6-7. I would suggest to delete the values shown in the upper part of the bars and put them in the Y axis (XY plot). It is the way of presenting that sort of information.
