Comments from Anonymous Referee #1	Author response	Author`s changes in manuscript
This paper address relevant scientific question within the scope of Solid Earth. Although this paper may not very novel concepts but it would be useful to know the research work that have been done in the different soil type. However, the conclusion and discussion need to be added on how this outcome of this work could be applied in the field situation and analyse and compare cost effective of this method.	Correction have been made	14 (L 8) and Table 1
