Dear Dr. Ahmadi,

Your manuscript has been seen by two reviewers who are both positive towards publication.

Reviewer 1 suggests that you provide more details on data acquisition and processing and also provides some ideas for parameter choice for the processing.

Reviewer 2 would like to see a comparison between your results and the results by Juhlin (2010) based on the same data.

C323

Both reviewers provide a series of detailed comments and suggestions which should be taken into account for the revision.

Best wishes, Hans Thybo
