Dear Prof. Hans Thybo,

Thank you for handling our paper. We acknowledge two reviewers for their constructive comments. We have tried to reply each comment and followed their suggestions. To reply the first reviewer, more details about seismic acquisitions and processing were added in the tables and text. To address the second reviewer's comment, in the discussion section of the paper, we have tried to compare the new survey with the old one by Juhlin et al. (2010).

Best regards,

C517

On behalf of all the authors,

Omid Ahmadi
