The two reviewers have provided detailed, valuable and consistent comments about the paper by Bowin et al. Although the suggestions for changes are many, they are very specific and I'm sure they will be useful to the authors should they decide to submit a revised version of the manuscript. I'd like to encourage the authors to prepare a revised version, following the suggestions of the reviewers, and submit it to SE, as the topic is clearly of broad interest and suitable for the journal.
