Dear Referee,

Thank you for your helpful comments. We have added information about the current management of the research area in the manuscript. Unfortunately, some information is impossible to obtain – for example, the exact dates of afforestation. Our paper uses oral information provided by Tomasz MĄćczka who works for Tatra National Park. However, there are no documents confirming exact dates of afforestation exactly in the

C809

research area. We do not have any detailed information about the state of degradation in Jaworzynka Valley prior to the ban of grazing, although we are aware of the fact that this information would be very useful. We will try to consider technical remarks.

Regards, Katarzyna Wasak and Mark Drewnik
