Received and published: 23 July 2015

Dear Karen,

As you can see, there are now three reviews of your manuscript. Although the comments were very encouraging, all three reviewers highlighted areas of the manuscript that could be improved. I would perhaps class this as "moderate revision". Please now respond to all the comments in the form of a rebuttal letter. Once complete, please upload the rebuttal letter and the revised manuscript onto the website.

Thanks for considering Solid Earth for your manuscript,
