We noted after acceptance of the discussion paper that the referencing of the magnetic anomalies to the CDP numbers is incorrect. A different version of the profile was used when the depth to the magnetic basement was being calculated. The correct locations for the paper are CDPs 1250, 2550 and 3550 with corresponding depths to magnetic basement of 1.3, 1.3 and 1.0 km, respectively. This correction concerns the caption to Figure 7a and Line 23 on page 18. Please take this correction into account when reading the paper.
