Dear authors,

Congratulations for your manuscript. I just want to share some comments on figures and tables.

FIGURES

Please, avoid using bold fonts and yellow backgrounds in figures 1, 2 and 3. Also, change commas into dots for decimal places.

May you move footnotes with abbreviations to the captions?

TABLES

As in figures, move the description of abbreviations to the head in table 2.

Tables 3, 4 and 5. Avoid using bold and use asterisks (*) instead to mark values. Explain what do marked values mean. The "1" diagonal and cells above are not necessary, remove them.

Table 6. Move information about p-values to the head. All non-marked correlation (p >= 0.05) factors are not necessary, so remove.
