Dear authors,

Congratulations for your work. I just would like to share some comments on figures.

In general, larger fonts should improve readability in the final version.

Figures 1 and 2: the legend (boundary) is not necessary in the maps. Just explain what are these lines in the caption (province or district borders?).

Figure 4. Use the same font size that in figs. 1 and 2.

Figure 5. Tickmarks in the X axis should be in, not between years. Can you add the ANOVA p-value to the regression equation and R2?

All the best
