Interactive comment on “Effects of wheat stubble on runoff, infiltration, and erosion of farmland in the Loess Plateau, China subjected to simulated rainfall” by Linhua Wang et al.

Anonymous Referee #1

Received and published: 30 December 2016

1. Line 31-32: Please append some new studies in this field. 2. Line 216: The infiltration amounts under WS were very similar, which show no significant among different slopes. 3. In the sector 3.3, I suggest authors to provide some insights about the performance of wheat stubble on soil loss at various slopes. The results also should introduce in the abstract section. 4. Line 269-271: The language should further polish.
