eral, we are pleased by the positive and constructive comments of the four reviewers. Please find the comments of the reviewers attached, along with our responses below each comment (changes made to the manuscript are highlighted in red in the attached manuscript). We believe that we have suitably addressed the reviewers' comments and, by doing so, substantially improved the manuscript. We hope that you agree and that the revised manuscript will be considered for publication in Solid Earth.

Kind regards

Sunday Adeniyi and co-authors
