Interactive comment on "Joint interpretation of magnetotelluric, seismic and well-log data in Hontomín (Spain)" *by* X. Ogaya et al.

X. Ogaya et al.

xeniaogaya@gmail.com

Received and published: 10 May 2016

The authors would like to sincerely thank Ian Ferguson for his interesting and useful comments, especially for the ones related to the correlation of the well-log resistivity and velocity data. All comments and suggestions have been adopted for the most part in this revised version of the manuscript. We summarised below how the changes have been addressed and implemented, indicating our answers in normal case and the sentences in the manuscript in italic. The page and line numbers (PX LXX) in the responses correspond to the new numbering in the manuscript. Please see the attached file.

Please also note the supplement to this comment:
