Dear respective author

Thank you for your comment about the types of image classifications and meaning of the pixel, it was very informative.

It is the first time in my life to see the application of image classification technique to NDVI image. I wont argue with you more about the subject, and whether it is correct or not. The end this, please cite as many research articles as possible which used supervised classification to classify NDVI single band image that has no spectral signatures at all, and I need you to tell me how many training sites did you use to perform such a

C1

classification.
