Detailed response to Reviewers' Comments(se-2016-46-RC1)

Comment: Title and abstract adequately represent the content and the conclusions of the paper. Illustrations are all necessary and of good quality. However, try to use keywords that are not included in the paper title and check for any syntax errors that mislead the reader.

Ans: We rethink the other keywords and syntax errors have been modified, which is shown in the current manuscript. e.g. Keywords: Vegetation greenness, NDVI, rainfall, soil moisture, Mann–Kendall method
