Received and published: 12 June 2016

Dear Sir/Madam, We would like to thank you for your comments for the improvement of our paper. First of all, we would like to emphasise the fact, that paper's main objective is the demonstration of benefits in remote sensing of the natural phenomena with the use of sUAS. That is the reason of using photos as collected data in our research/why no other data than photos are used in this paper. All of your comments were taken into consideration and our paper was reviewed. All changes and editing are highlighted in the paper.

Best regards

Jozef Gallik
