The review of Richard Ernst is also very well-disposed and positive; all his remarks concern a quality of language. Richard's English is mother language, and I was very keen to follow all his suggestions. Summing up the work I have done on the manuscript after I received both reviews, I must admit that it was mostly making language corrections. As for the essence of the text, the reviewers in fact did not expect any serious changes, and my work in this direction was limited mostly to addition of some references here and there, moderate expansion of the subdivision, dedicated to metamorphism (some additional information on the Beloretsk complex), an acknowledgement to Russian Science Foundation and a gratitude to the reviewers.
