

## ***Interactive comment on “Land use and land cover change based on historical space-time model” by Qiong Sun et al.***

**Qiong Sun et al.**

sunqiongsqsq@163.com

Received and published: 20 July 2016

(1) comments from Referees 1) The objectives are not clear and concise. Please, provide the aim and objectives following i), ii), iii),... 2) Fig. 1 is not referenced in the text. Please, proceed. 3) Fig. 2. This figure is completely wrong. Maps always have to include at least their scale (at least the scale graph), legend and north arrow. 4) The introduction and method sections are correct, but not the results, discussion and conclusion ones. Please, proceed like this if possible: -Results. Authors should give more details and information about the study as well as describe them more thoroughly. -Discussion. This section is too short; more discussion is necessary. -Conclusions. Please, rewrite the conclusions replying the aim and objectives of the study following i), ii), iii)... Conclusions are not a summary of the study.

Discussion paper

- (2) author's response 1. The objectives have been listed and numbered by i) and ii).
2. A literature has been added for figure 1.
  3. The figure 2 has been improved by adding scale and the arrow for north.
  4. The content of the result, discussion and conclusion parts has been revised according to the suggestions.
- (3) author's changes in manuscript Please see the changes in the attached supplement

Please also note the supplement to this comment:
