

Interactive comment on “Land use and land cover change based on historical space-time model” by Qiong Sun et al.

Anonymous Referee #1

Received and published: 1 July 2016

1) The objectives are not clear and concise. Please, provide the aim and objectives following i), ii), iii),... 2) Fig. 1 is not referenced in the text. Please, proceed. 3) Fig. 2. This figure is completely wrong. Maps always have to include at least their scale (at least the scale graph), legend and north arrow. 4) The introduction and method sections are correct, but not the results, discussion and conclusion ones. Please, proceed like this if possible: -Results. Authors should give more details and information about the study as well as describe them more thoroughly. -Discussion. This section is too short; more discussion is necessary. -Conclusions. Please, rewrite the conclusions replying the aim and objectives of the study following i), ii), iii)... Conclusions are not a summary of the study.
