

Interactive comment on “High-resolution shear wave reflection seismics as tool to image near-surface subsurface structures – a case study in Bad Frankenhausen, Germany” by Sonja Wadas et al.

Sonja Wadas et al.

sonja.wadas@liag-hannover.de

Received and published: 28 September 2016

We want to thank Janina Kammann and an anonymous referee, who invested their precious time writing the reviews and therefore helped improving the manuscript.

The PDF file contains the reviewer comments, the corresponding author comments, and the differences between the two manuscript versions. Any removed words are crossed out with a single line and colored red, whereas any added words are underlined with a squiggle and colored blue.

Modifications of images are described in in the table.
