Dear authors,

First, thank you for submitting your work to Solid Earth. As you can see, I've now received two reviews of your manuscript. Based on these reviews, I recommend "major revision". If you choose to revise and resubmit your manuscript, please now prepare a detailed, point-by-point rebuttal letter and a revised manuscript. In particular, I agree with reviewer #2 in that the manuscript could be improved by an overall shortening, including the removal of any instances of repetition.

Kind regards,

Mike Heap (topical editor of Solid Earth)
