Interactive comment on "Arrested development – a comparative analysis of multilayer corona textures in metamorphic rocks" *by* Paula P. Ogilvie and Roger Lawrence R. L. Gibson

T. Johnson (Referee)

Tim.Johnson@curtin.edu.au

Received and published: 5 October 2016

this is a nice review paper, which is both well-written and illustrated. i do not have any major problems with it. however, i have made a number of comments and/or suggestions for changes that would, in my opinion, improve the paper. these are all contained within an annotated pdf attached to this review. rather than repeat these in a detailed narrative here, please refer to that document.

i look forward to seeing the paper appear soon.
