Dear Editors,

Thank you for your acceptance of the manuscript "Interpretation of zircon corona textures from metapelitic granulites of the Ivrea-Verbano Zone, Northern Italy: Two-stage decomposition of Fe-Ti oxides." I am attaching the final version of the text, with all corrections introduced, and the grammar and phrasing double-checked. Figures improved, where required. I hope this version would be satisfactory as a final submission

version.

Thank you, Best wishes, Elizaveta Kovaleva
