Interactive comment on "A review of analogue and numerical modelling in volcanology" *by* Janine L. Kavanagh et al.

S. Buiter (Editor)

susanne.buiter@ngu.no

Dear Janine, Samantha and Simon,

Thank you for posting the responses to the two reviews of your manuscript. Both reviews offer many constructive suggestions and i am glad to read they are useful to you in the revision of your manuscript. I just want to make one point and that is that i have noticed that one of the reviews suggests a long list of references, including many papers on which the referee is the main author or co-author. You most certainly do not need to include all these references. It is up to you which of the suggested references you feel will help your paper and you therefore would like to include.

You can read more background to this in the guidelines of Solid Earth for authors,

editors and referees at https://www.solid-earth.net/about/publication_ethics.html

Thank you again for submitting your review manuscript to our special issue on two centuries of modelling across scales. I am looking forward to your revised version!

With best wishes, Susanne
