

***Interactive comment on “Formation and characteristics of an Ultisol in Peninsular Malaysia utilized for oil palm production” by Arolu Ayanda Fatai et al.***

**Anonymous Referee #2**

Received and published: 25 October 2017

Dear Dr. Arolu Ayanda Fatai Thank you very much for sending the paper to Solid Earth. However in the current status the paper is not ready to be accepted to publication. The rationale is very poor, the methods are not well described, and the number of samples are not enough to for this work. You need to do more profiles... In addition, nothing is mentioned about the impacts of Oil palm plantations on land degradation. This is important Attached I send a PDF with some comments

Please also note the supplement to this comment:
