Received and published: 9 November 2017

Dear authors, your manuscript has been read and reviewed now by two reviewers and myself. It is a nicely readable and very suitable piece of work for SE. Since all reviewers came to the conclusion, that the combination of a review and a strong original experiment part in one manuscript is not convincing, please revise your paper accordingly. In this sense, I am happy to receive a fully elaborated review paper as revision, and I am confident that it will make its way in SE. With best regards, Lotte Krawczyk.
