Received and published: 25 March 2019

Dear Dr. William Dunne,

We would like to extend our greatest thanks to you for your extensive and hugely helpful review of our manuscript. Your comments have certainly helped improve the message we want to present, along with improving the rigor of our science such that we weren't 'subjective' in our interpretation of 'subjective bias'. In response to your review we have undertaken a restructuring of the Discussion section, and added a number of key references which help strengthen our argument. Please find our full reviewer response attached as supplementary information.

Kind regards, Billy J Andrews
