Received and published: 15 January 2019

I just realized that the first supplement I uploaded contains quite a number of un-commented text marker highlights. Some of those were just marks I left for my own attention during a first perusal. They are deleted from the new supplement. For others, I have added the comments. Remaining un-commented marks refer to missing blanks, missing hyphens, erroneous capitalization and so forth. Some indicate issues I already marked and commented on further up in the MS.

Please also note the supplement to this comment:
