Great - now please hit all buttons on the system to make it clear it's the final submission. The SE editorial process is like the EU: great intentions, but a bit of a swamp to wade through. And the fact that this brief note merits the status of an official online document with its own doi is just bizarre (<https://doi.org/10.5194/se-2018-14-EC1> for the record).

regards Mark
