

Interactive comment on “Enhanced pore space analysis by use of μ -CT, MIP, NMR, and SIP” by Zeyu Zhang et al.

M. J. Heap (Editor)

heap@unistra.fr

Received and published: 25 June 2018

Dear Mr. Zhang,

Firstly, thanks for submitting your work to Solid Earth. As you can see, I've now received three reviews of your paper. All three reviews highlight an interest in your data, but all three state that major revisions are required before your manuscript can be seen as appropriate for publication in Solid Earth. If you are willing, please now prepare a detailed point-by-point rebuttal letter and a revised manuscript.

Thanks,

Mike Heap (Topical Editor of Solid Earth)
